Animal Encounters

offered by Dr. Christina V. Tran, VCES parent

Do you know how many stomachs an alpaca has?
Have you ever wanted to pet a chicken?
Did you know that bunnies' teeth always grow?
Have you ever seen a hairless cat?

If you're interested in the answers, this class is for you!

You will learn everything useful about dogs, cats, bunnies, chickens, alpacas, and more.
You will also have an opportunity to get up close and personal with these amazing creatures.
We will talk about how to safely handle and take care of these animals in a hands-on interactive setting.

Background: Dr. Tran has been practicing for over 10 years in private practices and small animal shelters. She is currently a faculty member at PCC and teaches in the Veterinary Technology Department. Both her children attend Valley Catholic and help care for their many pets.

DETAILS: Mondays 3 pm – 4 pm
Grades K-2 15 students max

COST: \$110 for 8 sessions
