

Valley Catholic's
10th Annual Science Fair
Friday, April 27, 2012
SCHOLARSHIPS AND TROPHIES AWARDED

MIDDLE SCHOOL

October 24, 2011

Dear Science Teachers,

Mark your calendars for Valley Catholic's 10th Annual Middle School Science Fair. Sixth through Eighth grade students are invited to perform a science inquiry experiment of their own design. They will then submit their results in the form of a written report, and a traditional three-panel poster at the fair. Their project will be judged on the merits of their report/poster exhibit, and interviews with judges. Trophies will be awarded for the first, second, and third place winners of each category by grade. Eighth grade first place winners will also receive the coveted science fair lab coat and scholarship to the Catholic high school of their choice.

The format of the Science Fair consists of three categories in the discipline areas of Physics, Life and Chemistry/Earth Sciences for each grade level. Your school is invited to submit three of the best science projects per grade level for each of the three science disciplines. Each student who submits a project receives a participation ribbon.

Participants must attend the Science Fair on April 27th from 5:30 - 9:00 pm (setup and safety check of exhibits begin at 4:30 pm). Participants must stand/sit by their projects, and answer questions posed by judges, and the viewing public. Project rules, safety rules, entry forms, and hints and tips are posted on-line at www.valleycatholic.org. Entry forms and fees must be received by 5:00 PM Friday, April 13th. Please note that experimental procedures and abstract are now a required element of the entry form.

If you have any questions or need any kind of assistance in planning for the fair, please do not hesitate to call or e-mail.

This is an exciting opportunity for our students to demonstrate their knowledge and be rewarded for their hard work in science. It is also going to be a lot of fun. I look forward to seeing you there!

Sincerely,

June A. Poling
